

## Data Sharing Statement

Title of the Article: Comparison between Optical Coherence Tomography and Fundus Fluorescein Angiography in detection of Cystoid Macular Edema in Tertiary Eye Care Centre in Nagpur, Maharashtra.

Question	Authors' Response
Will the data collected during your study be made available to others?	Yes
Kindly explain which data and how you wish to make that data available to other researchers.	Data related to the study may be provided to other research teams. Requests will be approved on a case to case basis by the corresponding author and specific data requested will be provided.
Additional information about data	-
How or where can the data be obtained?	By giving application to the corresponding author
When will data availability begin?	As soon as article gets published.
When will data availability end?	-
Will any supporting documents be available?	Yes
Which supporting documents will be made available?	Research material
Additional information about supporting documents	Literature, results related to the research
How or where can supporting documents be obtained?	By contacting the corresponding author.
When will supporting documents availability begin?	After 1 month
When will supporting documents availability end?	-
To whom will data be available?	To the researchers
For what type of analysis or purpose?	Any
Any other restrictions?	No
